

COMPUTER GRAPHICS FILM SHOW
SIGGRAPH VIDEO REVIEW

(cosponsored by ACM SIGGRAPH – Princeton Chapter)

Jeff Posdamer, CACI

For the twenty-fourth year in a row, we are kicking off our season of meetings with the very popular computer graphics film show. This will also be the eighth year for our current graphics speaker, Jeff Posdamer. Jeff will be showing some of the latest and greatest computer generated animated films from the most recent ACM SIGGRAPH computer graphics conference.

Jeff will show a variety of technologies: scientific visualization graphics, commercial graphics used in television and movies, and some examples of current computer graphics research. The films include everything from state-of-the-art supercomputer technology to graphics that can be done with today's personal computers. Come see why this is the best attended meeting we have all year.
